[CONTAINER LOADERS]

Loading shipping containers at 90 degrees enables companies to fill 100% of a container's volume, therefore optimizing freight efficiency. Shipping containers can be inserted either directly with a standard trailer or from above with a forklift, crane or reach stacker.

OTHER BENEFITS:

- Speed up the container loading process.
- Reduce labor.
- Weight the container during loading.
- Maximize operator safety.

A-WARD™

COFFEE

Kraft Foods in France uses an A-Ward container loader to load coffee beans into shipping containers for domestic storage.

PLASTIC GRANULES

Coca-Cola, Tetra-Pak, Indorama, Abu Dhabi Polymers and Bumi Mulia all use A-Ward container unloaders to unload polymers.

[CONTAINER UNLOADERS]

A-Ward container unloaders enable immediate and controlled unloading of shipping containers and remove the reliance on expensive and scarce tilting trailers. Shipping containers can be inserted either directly with a standard trailer or from above with a forklift crane or reach stacker.

OTHER BENEFITS:

- Maximize operator safety.
- Reduce labor.
- Control unloading speed by adjusting tilt angle.
- Ability to unload over a longer period of time.
